

Myfi is positioned as a multi-chain decentralized  
comprehensive financial service platform  
( 2021 )

White paper V0.1

## What is "Myfi"?

Myfi is a decentralized integrated financial service platform based on Heco, which will be deployed to the ETH、BSC、OKEX one after another, dedicated to multi-chain interworking financial platform.

## 1.MY TOKEN Key Value of Certification

MY are Myfi governance tokens, users holding MY tokens will enjoy community governance, currency holding, LP、pledge, voting, handling fee distribution and other different income dividends.

## 2.MYFI Token Economic Model

Myfi pioneered extreme deflation, market value protection, participation is a dividend model.

3% tax is automatically charged for each transaction MY:

1% Automatic injection into the MDEX MY/HT to provide liquidity, unable to retrieve, continued to cause the price bottom line rising, ensuring market value stability.

1% Automatic penetration black hole address, unlimited destruction.

1% dividends to participants (25% currency dividends ,35%

---

LP dividends ,40% pledged dividends) global win-win!

### 3、"Myfi" development road map

1. Go online MYFI mining dividend mine pool
2. Online MYFI board dividends
3. On-line Non-destructive Mining Multi-strategy Gun Pool
4. Online NFT card draw team mode
5. Online NFT auction platform

### 4、MY Certificate Issuance Notes

MY for governance and dividends generated by the certificate, the total supply of 21000000

**MY card distribution scheme:**

## MY TOKEN Distribution

- 
1. 50% DEFI mining
  2. 10% Team
  3. 3% Airdrop
  4. 30% institutional investors + ecological construction
  5. 7% market + resources cooperation

### Invite airdrop:

10,000 MY were shared

Generate exclusive invitation links to become valid invitees,  
each invite one person to receive 2 MY airdrop.

### Invite reward:

Invitation to share incentive rules:

Generate an exclusive invitation link to become a valid inviter with a three-tier reward for the income of the lower inviter (each mine pool has a reward): level 1 10%, level 2 5%, level 3 2%

Sharing rewards can have burns, and inviting hostages to take less than the invited person shares only a normal 10 percent of the proceeds.

The MY that share the reward will pay 0.005 HT as a tax, and the tax will be used to buy back MY

### **Pledge pool mining:**

One block dug out 2 MY ,57600 MY. dug out a day

LP pledge pool:

Type	Token pledge	Yields
LP pledge pool	MY	13000 MY / days
	MY /USDT	20000 MY / days
	MY /WHT	20000 MY / days
	USDT	4600 MY / days

Liquidity mining, as a liquidity provider, will take place in

---

MY 、MY /USDT、MY /HUSD、MY /W HT 3 pools, each of which will be rewarded on a daily basis according to the weight MY output

Reduction rule:

Reduction of 20% per 5 hours on the first day and 20 % per 3 days after the day

MY the token distribution plan is tentatively as above, it may be adjusted according to the situation, and the results will be published in the form of official community announcement. Please pay attention.
